

SECRET**MISCELLANEOUS WEATHER REPORTS FOR JUNE 1951****Moscow, Sotsialisticheskoye Zemel'del'ye, 1 Jun 51**

On 31 May, the cool weather which set in yesterday spread throughout Belorussia, the central chernozem zone, and the Middle Volga Region.

Rain continued to fall in the northwestern part of the European USSR. Quite heavy rains fell in the Urals; locally, 14-17 millimeters fell there during the first 12 hours. Light rains were recorded in Voronezh Oblast, Saratov Oblast west of the Volga, the western Ukraine, and in Moldavia.

Warm weather in the south is promoting the growth of agricultural crops. Spring wheat is stemming out in the southern part of Kursk Oblast and central part of Saratov Oblast. It is heading around Kemerovo in Moldavia. Winter wheat in the Paltava area and winter rye in the Sarny area of Rostov Oblast are blooming.

It has become cooler throughout Siberia, in Transbaykal, and in the Far East.

Moscow, Sotsialisticheskoye Zemledeliye, 12 Jun 51

On 10 and 11 June, very warm weather continued in the southeastern half of the European USSR as well as in Kishinev, Kiev, Orel, Kamen', and Sverdlovsk. Daytime temperatures there hovered around 25 degrees. The thermometer recorded 30 degrees at noon in Chkalov, Saratov, and Stalingrad.

Moderately warm weather continued in the western Ukraine, Belorussia, Baltic countries, and in the central zone.

On 10 June, rain fell in the southern Ukraine and in Murak, Voronezh, Tambov, Ryazan, and Gor'kiy oblasts. Local rains fell in Stalingrad and Saratov oblasts as well as in many areas of the Caucasus and Transcaucasus.

Conditions for the growth of crops are good everywhere. Winter rye has already reached the waxy stage in many areas of the North Caucasus, has entered the milky phase in the southeastern half of the Ukraine and in the Lower Volga Region, and is blooming in most areas of Belorussia, Orel, Penza, and Ul'yankovsk oblasts, and in Bashkir ASSR. Rye is heading ^{out} in areas as far north as Vologda and Molotov oblasts.

Warm weather with daytime temperatures of about 25 degrees has set in in West Siberia. Light rains fell on 10 June in Irkutsk Oblast and the northern half of Krasnoyarsk Kray.
